

OUR SERVICES

At NTS, your sustainability is our priority. NTS offers a broad spectrum of services to assist contractors, property owners, architects, and engineers to provide quality assurance and quality control for various construction projects. During the project's design or proposal phase NTS can provide a variety of tests to assist the architects or engineers in their decision process.

Once the project begins NTS offers both field and laboratory testing services. Testing services are provided by experienced, certified personnel. NTS also offers a variety of unique project specific field and laboratory services.

NTS is the Iron Range's only locally-based, full-service environmental science and engineering company. Headquartered on the Iron Range since 1985 with a focus on northeastern Minnesota, we are committed to providing world-class science and engineering to our local customers. We believe in sustaining the local economy by utilizing local workers and vendors.

Our services include environmental & geotechnical consulting; engineering & engineering support services; data management; water resource services; and site assessment & investigation. These services are provided to industrial, municipal, and governmental clients.

NTS has the ability to see the big picture and our business is built on a track record of proven success and long-term relationships. We have an in-depth understanding of the local regulatory, economic, and environmental conditions through close work with local stakeholders. We can identify and address potential issues with innovation and common sense solutions.
